

To whom it may concern,

I heartily recommend choosing National Fingerprint's Custom-Expedited service upgrade. We started directing National Fingerprint to a Midwest city and then went through three concierges while tracking a busy stockholder across the country. They caught up with him two thousand miles from where we started, printed him, chased down the last UPS truck out of town and overnighted the prints to the National Fingerprint lab courier who opened the lab for a transmission session just for us. Custom-Expedited covered everything. If your compliance is urgent and you need to be absolutely sure your VIP fingerprints get priority processed, this is the company and the method to use.

Nobody else was able to provide this level of service in our state, much less anywhere in the entire country.
